a. Does the water move through the straw? – Yes / No.

b. How is the straw similar to a plant stem? - Compare and discuss.

The stem carries water to the leaves and flowers.

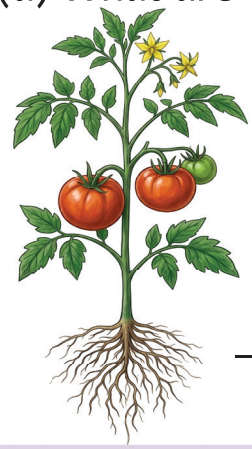

THB

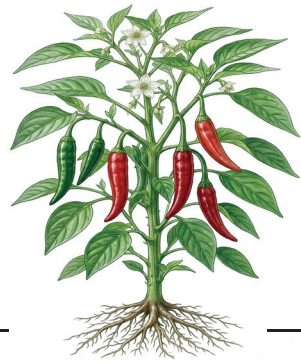

Give each student a clean straw. Do not allow sharing. Help children observe the water moving in the straw and relate it to the plant stem carrying water.

Observe and Discuss

How will you identify plants?

3. (a) What are these plants? Write their names. **(Chilli / Tomato)**

Plants can be identified by their parts.

(b) Which plant part helped you identify the plants first? Tick (✓).

- ○ Fruits
- ○ Leaves
- ○ Stem
- ○ Flowers

(c) Draw a tomato and a chilli.

Tomato	Chilli

Discuss: Are all the fruits the same size and colour?

THB

Show children real tomato and chilli plants, if available. Ask them to observe, compare and discuss how they identified the plants.
