Flowers

CY3LA

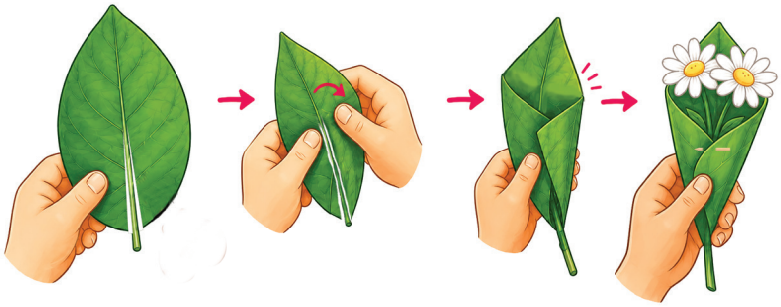

Why do flowers make us feel happy?

Activity time

1. Make a Flower Bouquet.

Madhu made a small flower bouquet and gave it to her Grandma.

1. Tear from the base up to the middle on both sides.
2. Fold one side in.
3. Fold the other side in.
4. Pin the leaf ends together with a small broomstick. Place two flowers inside.

Now, make a bouquet using flowers and leaves around you and give it to someone you like.

THB Help children make a flower bouquet using available flowers.

2. Smell the flowers and guess their names!

Flowers make our surrondings colourful and fragrant.

THB Collect fresh, locally available fragrant flowers and place one flower at a time in a cloth bag. Ensure every child gets a chance to smell, share their responses and name the flowers.
