Preface

The Tamil Nadu State Education Policy (TNSEP), 2025 emphasises activity-based, play-oriented and experiential learning at the primary stage to ensure that children attain competency based learning.

Unique elements to develop Math skills

Let us Learn

Connects lessons to everyday experience through stories and life situation

Let us Do

Helps children develop coordination and master new concepts by doing activities

Let us Practise

Strengthens foundational Math through games and activities

Let us Explore

Exhibits logical thinking

The standard one term II textbook is organised into two units.
These units follow a spiral approach.

Unit - I

- handles numbers
- identifies the shadows of objects

Unit - II

- performs number operations
- compares weight

Distinctive features of the textbook

Holistic Learning
Integrates art, motor skills, life skills and values

Teachers Handbook
Scaffolds teachers with activity descriptions and additional inputs beyond the textbooks

Digital Resources
Provides children with experiental, self-paced and various learning styles

Assessment and Remediation

The activities suggested in the textbook develop logical thinking, analytical skills, mathematical communication and 21st century skills through open-ended questions and exploration.

Learning Check

Provides scope at the end of each lesson to track the level of attainment of concepts

I can Do

Critical Learning Outcomes (CLOs) are measured through oral activities, written activities and projects

In the present technological era, children get a lot of exposure through various platforms and social interactions. Besides, the textbook is one of the resources for developing basic numeracy skills in the children. Hence, teachers are expected to go for multiple resources for accessing to additional activities for reinforcement of content, strengthening the content through multiple assessment tools for the effective application of concepts in real life situations and for developing mathematical thinking among our children.
